RAIL-MOUNTED CASEWORK

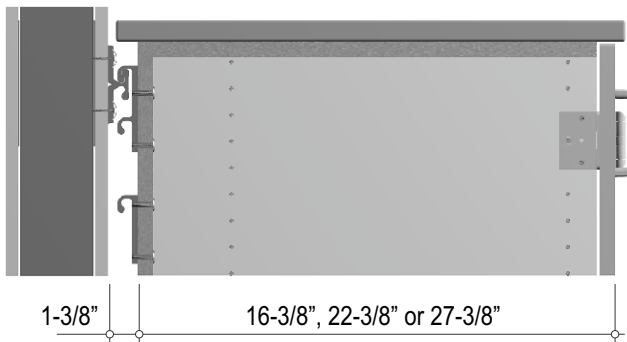

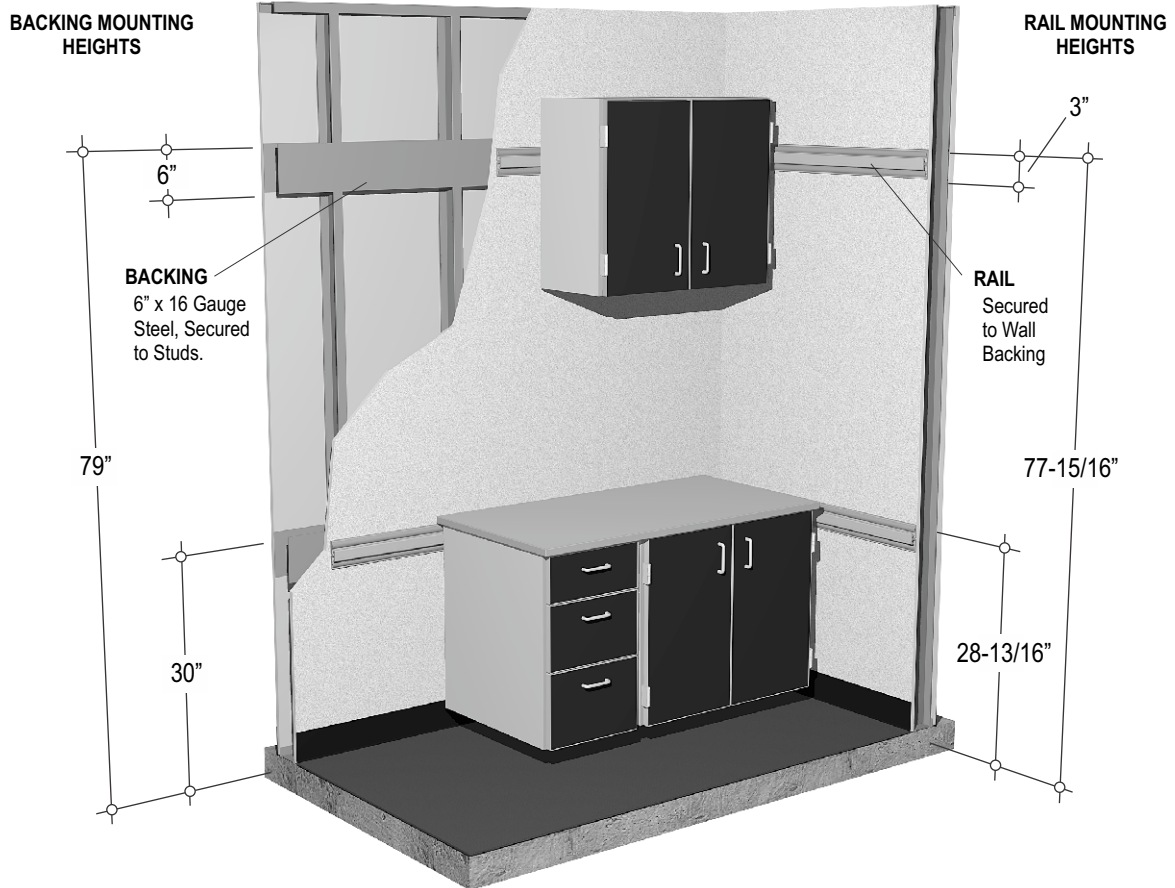

All TMI catalog sections are available online at: www.tmisystems.com/products.html

INTRODUCTION:

The TMI Rail-Mounted Product begins by mounting a rail to your newly constructed walls or to your existing walls. Cabinets are then mounted to the rail with a series of hooks attached to each cabinet back. A countertop is screwed in place and your elevation is complete.

FLEXIBILITY:

Because of the flexibility built into the Rail-Mounted Product, your casework can actually adjust as your needs change. Your need today may be a standard 30" high countertop. But tomorrow, when that new piece of equipment arrives, you may need a 36" high countertop. Simply unscrew the countertop, raise your cabinets to the proper hook location, re-attach the top and you're ready to take delivery on that new equipment.

RAIL-MOUNTED DEPTH DIMENSION:

The dimensions shown in the Reference Guide are the actual cabinet box dimensions. An additional 1" allows for the rail and hook hardware. For the actual usable storage depth subtract 1" for the door and 3/4" for the back.

RAIL-MOUNTED CASEWORK

All TMI catalog sections are available online at: www.tmisystems.com/products.html

CASEWORK MOUNTING HEIGHTS:

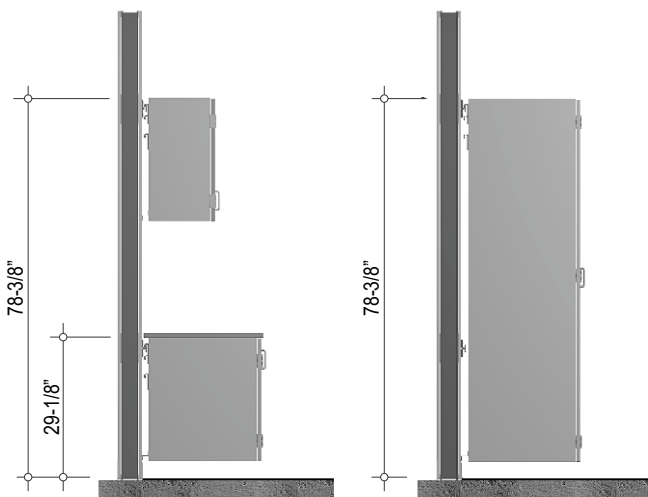

Each rail-mounted cabinet shipped from the TMI factory has the ability to adjust to three mounting heights. Countertops may be mounted at heights of 29-1/8", 31-5/8" and 35-3/8". (Dimensions not including the countertop thickness.)

INDEPENDENT TESTING:

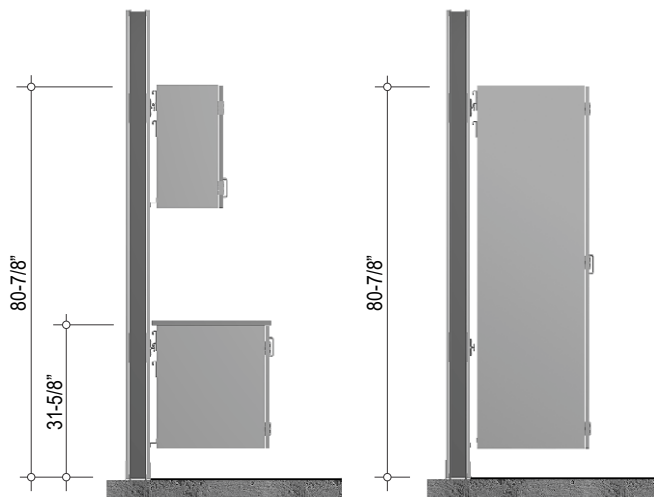

The TMI Rail-Mounted Product has been independently tested and has been certified as being in full compliance with the requirements of the Title 24 California Administrative (Seismic) Code. To receive copies of these testing results please contact your local TMI representative.

RAIL-MOUNTED CASEWORK MOUNTING HEIGHT OPTIONS:

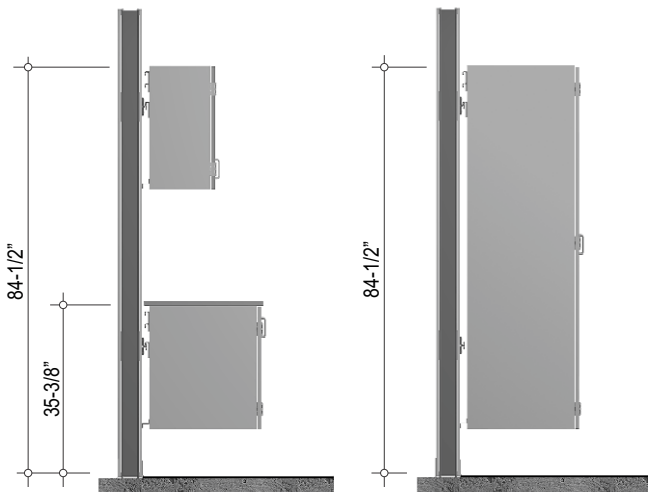

SITTING COUNTERTOP HEIGHT Utilizing Top Hook Mounting

ADA COUNTERTOP HEIGHT Utilizing Middle Hook Mounting

STANDING COUNTERTOP HEIGHT Utilizing Bottom Hook Mounting

RAIL-MOUNTED CASEWORK
